Professional Summary

AI Engineer with hands-on experience in designing and developing AI-powered software solutions, machine learning models, and data-driven applications. Proficient in transforming complex datasets into actionable insights to support strategic decision-making. Skilled in Python, Pandas, and advanced data visualization techniques, with a strong focus on building scalable, efficient, and optimized systems. Adept at leveraging AI and ML to solve real-world problems and drive innovation across domains.

Education

B.Tech in Computer Science, Vimal Jyothi Engineering College,Chemperi — Aug 2020 – May 2024

- **Coursework:** Computer Architecture, Database Management Systems (DBMS) , Artificial Intelligence and Machine Learning, Algorithms and Data Structures.

Work Experience

AI Developer, Summit Solutions – Kannur — May 2025 – Aug 2025

- Developing AI-driven systems using Python, CrewAI, LangChain, and Mistral, LLaMA 3 via Ollama.

Data Science Intern, Luminar Technolab – Ernakulam — Aug 2024 – Apr 2025

- Collected, cleaned, and analyzed data using Python, Pandas, and machine learning tools to generate insights.
- Designed predictive models, data visualizations, and EDA workflows to uncover key patterns and support data-driven decision-making.

Projects

Recruitment AI — *May 2025 – July 2025*

- Developed an end-to-end Recruitment AI using CrewAI, LLaMA 3, and FastAPI to generate job descriptions and assessments from parsed resume data.
- Automated candidate shortlisting and interview question generation using agents.
- Used OCR & NLP for resume parsing.

AI Question Paper Generator : GitHub link — *Apr 2025 – May 2025*

- Built an AI question paper generator with FastAPI, LLaMA 3 (Groq API), and RAG, producing syllabus-aware questions in 1.5s.
- Extracted the content from the PDF using OCR to prepare the knowledge base.
- Improved performance using Redis caching (<20ms hits, 70% and fewer duplicates).
- Automated PDF/Word export of exam-ready papers.

Multi-Modal Disease Predictor using ML & DL : GitHub link — *May 2023 – May 2024*

- Built a machine learning and deep learning model that improved healthcare service efficiency by 30%, reducing diagnosis time.
- Integrated text, voice, and image inputs, achieving 85% accuracy in disease prediction.
- Automated 80% of appointment scheduling and improved doctor recommendations.
- Algorithms & Technologies Used: Random Forest, CNN, Python, HTML, CSS

Skills

Programming Languages: Python, SQL

Libraries: NumPy, Pandas, Scikit-learn, Seaborn, Matplotlib, PyTorch, TensorFlow, Keras

Data Science & ML: AI, LLM, Machine Learning, Deep Learning, NLP, CNN, RNN, Power BI, Image and Voice recognition, OCR

Tools and Technologies: Git, GitHub, Visual Studio Code, Postman, Swagger, Redis, GenAI Tools, Retrieval-Augmented Generation (RAG), Embeddings, Docker, n8n, Fine-Tuning,

LLM Integration: Cloud-hosted LLM APIs (OpenAI, Groq, Anthropic, Openrouter etc.), local-hosted (llama-3, mistral 7B etc.)

Frameworks: Django REST Framework, LangChain, LangGraph, FastAPI

Databases & Cloud : Vector Database (AstraDB, ChromaDB), Microsoft Azure, MySQL, PostgreSQL

Research & Data: Annotation, EDA.

Languages: English, Malayalam, Arabic

Certifications

Edapt-Prompt Engineering For Generative AI Tools Jun 2024- Dec 2024

IBM Data Analyst Professional Certificate Mar 2024- Aug 2024

IITBombayX - Basic Programming Using Python Feb 2022-May 2022

IBM RAG and Agentic AI Nov 2025-Jan 2026

Other Details

Nationality : Indian
