Basim Abdul Salam

Kochi, Kerala | basimnnas@gmail.com | +91 9207931626 | LinkedIn | Github

Professional Summary

Data Scientist with expertise in machine learning, data analysis, and predictive modeling. Skilled in transforming complex data into actionable insights to drive decision-making. Strong proficiency in Python, Pandas, and data visualization, with a keen ability to optimize processes and improve efficiency. Adept at leveraging AI-driven solutions to solve real-world challenges.

Education

B.Tech in Computer Science, Vimal Jyothi Engineering College,Chemperi — Aug 2020 – May 2024

- **Coursework:** Computer Architecture, Database Management Systems (DBMS) , Artificial Intelligence and Machine Learning

Work Experience

AI Developer, Summit Solutions – Kannur — May 2025 – Present

- Developing AI-driven systems using Python, CrewAI, LangChain, and LLaMA 3 via Ollama.
- Building and deploying RESTful APIs with FastAPI for seamless integration of AI services.
- Utilizing tools like Git, Docker, and VS Code to ensure scalable and maintainable development workflows.

Data Science Intern, Luminar Technolab – Ernakulam — Aug 2024 – Present

- Collected, cleaned, and analyzed data using Python, Pandas, and machine learning tools to generate insights.
- Designed predictive models, data visualizations, and EDA workflows to uncover key patterns and support data-driven decision-making.

Projects

Zomato Insights Dashboard — April 2025 - May 2025

- Built an interactive Power BI dashboard using DAX and data modeling to visualize Zomato's sales, orders, and ratings segmented by city, year, and food category.
- Enhanced decision-making by delivering actionable insights through trend analysis, geo-level comparisons, and performance tracking.

Car Sales Price Prediction — Dec 2024 - Jan 2025

- Built a linear regression model to predict car prices using features like brand, year, and power.
- Utilized Python, Pandas, and data visualization for predictive modeling.
- Improved prediction accuracy by 20% through pattern and trend analysis.

Multi-Modal Disease Predictor using ML — May 2023 - May 2024

- Built a machine learning and deep learning model that improved healthcare service efficiency by 30%, reducing diagnosis time.
- Integrated text, voice, and image inputs, achieving 85% accuracy in disease prediction, improving doctor recommendations, and automating 80% of appointment scheduling.
- Algorithms & Technologies Used: Random Forest, CNN, Python, HTML, CSS

Skills

Programming Languages: C, Python, HTML, CSS, SQL, OOPS.

Libraries: Numpy, Pandas, Scikit-learn, Seaborn, Matplotlib, CNN, Pytorch, Tensorflow, OpenCV, GenAI.

Data Science - Analytics: AI, Machine Learning, Deep Learning, NLP, Computer Vision, YOLO, PowerBI.

Tools and Technologies: Git, Github, Visual Studio Code, AWS, Microsoft Azure, Kubernetes.

Languages: English, Malayalam

Certifications

Edapt-Prompt Engineering For Generative AI Tools Jun 2024- Dec 2024
IBM Data Analyst Professional Certificate Mar 2024- Aug 2024
IITBombayX - Basic Programming Using Python Feb 2022-May 2022
